

## **SureFire Defender Series LED Flashlights with Strike Bezel**

Whether you are the kind of person who likes to go on an adventure or not, a bright and durable flashlight will come in handy anytime. One of the best tactical flashlight 2017 is the series from SureFire Defender. With the latest technology on LED and lasting durability, it's the tactical flashlight that will help you in any case of darkness.

Basically, a tactical flashlight is used by police and military forces personnel. A tactical flashlight is not only used for emergency lighting, but also for self-defense. There are techniques in using it for self-defense such as disorienting an attacker and hit him in the right spot. Whatever the purpose is, a tactical flashlight is something that you need to have in your pocket.

### **The Lighting Technology of SureFire Defender Series LED Flashlight**

Most standard flashlight with LED lights beams around 200 lumens of light with different distance and spill. SureFire Defender series bring you more than that. With a maximum brightness of 600 lumens, SureFire Defender tactical flashlights also have a low option on 50 lumens. In summary, it has all the brightness you need in every situation.

### **Battery Type and Durability**

With the high lumens, SureFire LED technology is known for its durability. On high brightness, it can stand for a full 2.5 hours. There are two types of the SureFire Defender tactical flashlight with Strike Bezel. Those are the SureFire Defender and the SureFire Defender Ultra-Compact. The SureFire Ultra-Compact has a smaller size with less luminous flux measurement. While the SureFire Defender carries 600 lumens on high and uses two CR123A lithium-ion batteries, the Surefire Defender Ultra-Compact beams 300 lumens of light and uses a single CR123A lithium-ion battery.

### **Features**

The small size of the SureFire Defender series with Strike Bezel does not mean it has minimum features, too. In summary, below are some of the features of this one of the best tactical flashlight 2017:

- The compact size fits in your hand and pocket. With a redesign pocket clip, you can easily attach it to your belt or bag.
- It has the best peripheral vision on its class. The SureFire Defender series has an excellent spill with a concentrated beam on the center. The light also has a wide range yet it focuses on your target.
- It has a special Strike Bezel from the SureFire Defender. The bezel design makes the tactical flashlight suitable for self-defense. It can break glasses in emergency cases, and can also work as a weapon to defend you from an attacker.
- It has a long durability with an aerospace aluminum body.
- O-ring seal on the coated tempered glass makes the tactical flashlight safe for the wet environment.
- It uses a single button to control the light. On the tail, it has a single button that can produce different light with a press and click mode.

As one of the best tactical flashlight 2017, the brand competes with other tactical flashlight brands. However, SureFire Defender has what it takes to be in your pocket all the time.

### **The Pros**

SureFire Defender series is always known for its durability and strength. It also has a focused yet excellent spill on the light beam. The ergonomic design also fits perfectly in your hand and will endure in most of any weather.

### **The Cons**

It consumes a rather expensive battery especially if you use it on a high setting for a long duration. However, if you are relying on this tactical flashlight for everyday use, you might want to consider buying rechargeable batteries to reduce cost.
